

Cognitive Revolution

Rudolf Jovero

March 31, 2024

Contents

The cognitive revolution refers to the shift from **roam:Behaviorism** and **roam:structuralism** in psychology and linguistics, into a paradigm of cognition. The cognitive revolution was largely influenced by the fields of information theory and the new field of computer science from 1940 to 1956. [**frankishCambridgeHandbookCognitive2012**]
